Need a small light capacity manual custom fixture/die cart?

TITAN 163559

Custom Fixture/Die Cart

This TITAN 163559 was designed with custom forks to transfer dies in and out of the press and to the storage location. Floor mounted docking rail brackets guide cart to precise transfer location. It is a manual transport system via an ergonomic push handle and an hydraulic mast lift, with an operator screen for safety.

Docking Rail

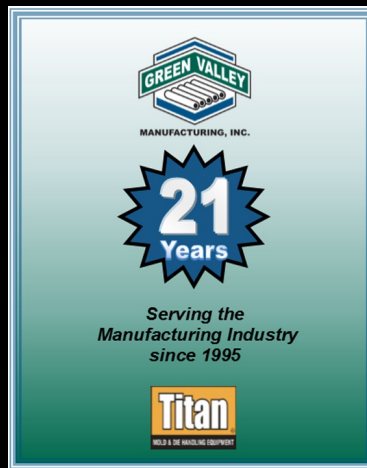

Custom forks and docking rail

Titan 163559 Manual Custom Fixture/Die Cart

Our highly competent team of engineers and technicians can design and manufacture tool handling systems for a wide variety of customers' needs, capacities, configurations, and environments.

Our [Heavy Duty Industrial Steel Sawhorses](#) (work stands) can be designed to meet the capacity, height, and configuration needed in the manufacturing environment. Staging of the sawhorses can be done easily without cranes or forklifts. No heavy lifting required, even though the horses weight about 400 pounds each.

[2016 Sawhorse Flyer and Price Sheet](#) now available.
