

May Feature: Don't break the bank! Check out our budget friendly Mini-Titans.

MANUFACTURING INC

Our Mini-Titan line of die carts is flexible enough to offer manufacturers options in a sturdy, durable, economical low capacity cart with minimal delivery lead times.

They sport the Titan name proudly.

Options Available:

- Capacity from 250 to 2000 lbs.
- Power lift
- Power push/pull
- Transfer Deck surface
- Single or dual decks

Mini
Titan®

Click above for more details on our webpage

The Mini-Titan, the new standard die cart line, offers a 250 to 2,000 lb. capacity range and demonstrates the same great quality and longevity and many of the great features that built the Titan name. The Mini-Titan series is much safer and faster than using a forklift or manual pump cart and is designed with a variable height deck (or decks) with manual cart mobility via ergonomic push handle. The transfer deck options include single or dual over & under decks, ball rollers, inline roller, steel, and low friction UHMW surface. The standard design allows Green Valley to respond to its customers' die handling needs with minimal lead times.

Mini-Titan Die Cart

The Mini-Titan next to a full sized Titan over/under die cart.

The Mini-Titan series was developed to complement our built-to-order line of Green Valley Titan mold & die handling equipment with capacities up to 140,000 lb +. The new standard Mini-Titan line offers low cost and short lead times for applications with lighter loads.

Our [Heavy Duty Industrial Steel Sawhorses](#) (work stands) can be designed to meet the capacity, height, and configuration needed in the manufacturing environment. Staging of the sawhorses can be done easily without cranes or forklifts. No heavy lifting required, even though the horses weight about 400 pounds each.
