TV Monitor on Operator station

Please click for a video at our test site of this Titan recently delivered to the end user's facility.

This Titan 173761 was designed to transport dies up to 132" x 60" weighing up to 15,000 lbs. and to circumnavigate obstructions in front of the press with a tight turning radius. Operator safety and visibility were paramount when docking at the press, so both dock and deck cameras were installed, and paired with a 2-channel monitor at the rider station.

Titan 173761

Features:

- Capacity up to 15,000 lbs.

Our [Heavy Duty Industrial Steel Sawhorses](#) (work stands) can be designed to meet the capacity, height, and configuration needed in the manufacturing environment. Staging of the sawhorses can be done easily without cranes or forklifts. No heavy lifting required, even though the horses weight about 400 pounds each.
